# Design Rationale 1

## “Cut it up” Animation

The singer is talking about cutting an avocado. I added the green line to show a cutting action, and then make the text at the right appear to fall off due to the “cutting” motion. This helps establish a sense of what is being said in the lyrics using the visualizations in the text.

# Design Rationale 2

## “Spread it up” Animation

The singer is talking about spreading an avocado over his toast. The green line animates to appear to spread over the screen, covering the screen, similar to how he would cover his toast with the green avocado. This helps establish a sense of what is being said in the lyrics using the visualizations in the text.

# Design Rationale 3

## “Sunny side eggs” Animation

The singer is talking about making sunny side eggs. The words ‘sunny side eggs’ appear to sizzle similar to how the eggs would sizzle when being fried on a pan. This helps establish a sense of what is being said in the lyrics using the visualizations in the text.

Thank you.
