Assignment 6A :

Shopping Cart

Low & High-Fidelity Prototypes

Low- Fidelity Prototype
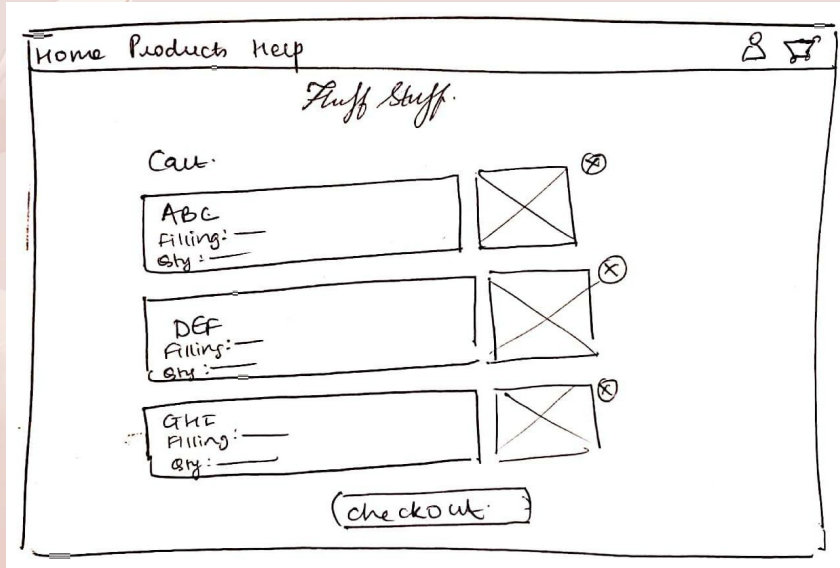

1. **Feature:** Each of the cart items are clearly segregated with a border/background color.
   Design Rationale: This helps users get see a clear segregation between different items in cart.

2. **Feature:** Images added to shopping cart
   Design Rationale: The descriptors for the names of the shopping cart are not very understandable. Including a photo of the item will help users understand what is the item in the cart.

3. **Feature:** 'X' sign to remove items
   Design Rationale: Make removal of items quick and easy.

4. **Feature:** Each of the cart items are clearly segregated with a border/background color.
   Design Rationale: This helps users get see a clear segregation between different items in cart.

5. **Feature:** Navigation bar, background image and color palette is not changed.
   Design Rationale: This is done to maintain consistency and cohesiveness in the website

High- Fidelity Prototype
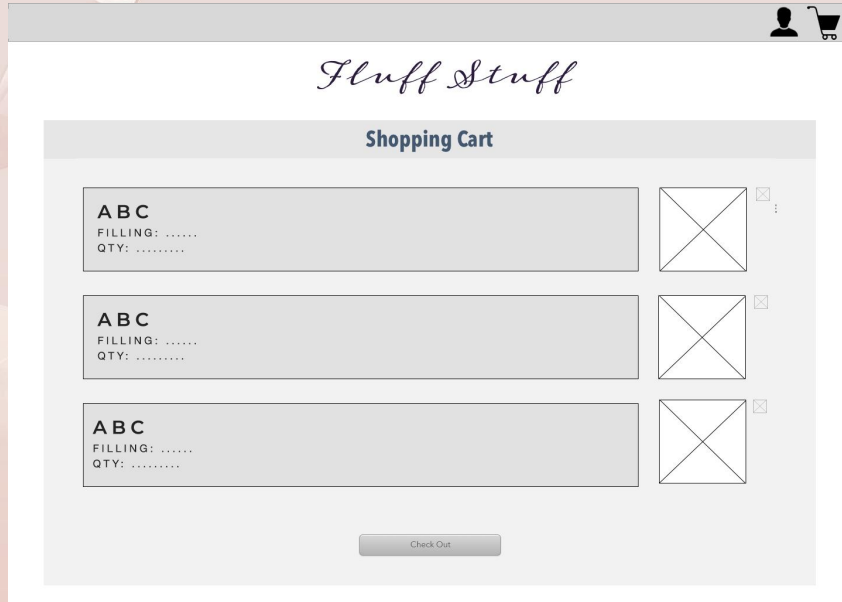

1. **Feature:** Contrast between different sections of the page
   Design Rationale: This is dont to make this website accessible to color blind people

2. More refinement of the UI
